

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

1:04:38 PM

I live in suburban Sydney and am about to invest in a rooftop solar power system. My intention is to help the environment, reduce my footprint and clean up the atmosphere to make this city healthier and more liveable for all. I am willing to make this personal investment as I know it is for my own and the greater good. As such I would appreciate you hearing my points contained in this submission:

Firstly, I support a fair price for solar;

I also believe the feed-in tariff should increase in line with the wholesale price of electricity. Furthermore, the feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

Ultimately the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

I look forward to a fair deal for all solar investors no matter how small.
