SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
5:21:26 PM

The benefits of roof top solar panels to assisting people address the ever increasing cost of power are many not only to the individual but to the national grid itself. The feed-in tariff should therefore increase in line with the wholesale price of electricity and retailers should be regulated to ensure they offer it to a minimum; this would encourage more households to buy solar for their own use and thereby reduce requirements on the grid.
