SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

4:47:58 PM

It makes no sense not to utilise the growing number of solar panels on people's roofs. It must be the cheapest and most environmentally safe way of gathering energy. But to be fair, there needs to be a reasonable rate paid to people who have invested in the panels. The feed-in tariff should increase with the wholesale price of electricity. That's only fair.
