

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Thursday, 11 May 2017
10:19:53 AM

It is time for a fair price for solar feed into the grid. I think it is a form of robbery to be paid 6c/ kWh yet that same unit is sold for up to 28c/kWh. I understand that a feed-in Fee has been proposed by IPART. Retailers should be made to pay this fee as a minimum for the units bought by them. It is neither right or fair that retailers should make super normal profit at the expense of the householder supplying the power. I installed solar for environmental and economic reasons and should be rewarded for this action not ripped off. For consistency feed-in payments should also be linked as a percentage of retail selling rates. I trust the above information and comments will be taken into account in your assessment of a fair deal for solar feed-in suppliers.

Regards
