SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

8:11:58 AM

First and foremost I support a fairer price for my electricity I send back to the grid, it should be regulated so it increases with the wholesale price. I have outlaid \$20000 to put solar on my house and I still have to purchase power in the dark hours so a fairer return for what I export only seems the right thing to do considering the inflated price I pay as a consumer..This feed in Tariff should represent value for money recognising the environmental and health benefits of rooftop solar.
