Submission: We paid for and had installed our Solar System at our expense. The Govt subsidy did not cover the costs and the private companies did not put any finances to our system. Why then are the Govt forcing us to give the excess solar we produce to companies that give us little or anything for receiving our power that we have generated. We are also charged in excess of \$1.40 per day (mandatory payment for the full year) for the joy of getting some of our power back when we have insufficient power produced with our solar system, and we have to pay for that as well. This is a disgrace and should not be allowed to happen.
