

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Saturday, 20 May 2017**

3:04:04 PM

We invested in a large solar system several years ago due to problems with supply and cost from Origin Energy. Now they put their hand out to take the power we generate and give an insignificant compensation for it. Our solar is better for the environment and society, the power companies should not be allowed to pay a token amount for it and then charge everyone unreasonable costs to pass it on to them. The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.
