**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
1:50:38 PM

It seems a fair movement in the right direction to more than double the unjust feed in present rate paid to households. We all signed up believing we would receive 60 cents a kilowatt hour for our unused solar energy which later was reduced to an insulting 6 cents per kilowatt hour. Meanwhile the feedin rates continue to rise. My wife and I went down this track believing it would protect us from bill shock into the future. We are both in our 70's and on the pension.
