

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
2:35:54 PM

Brief submission for a fair fixed feed in tariff rate, rather than a suggested range. A fairer minimum feed in tariff I definitely needed, and this FIT should also rise with any general wholesale increases. Something like a 50% of the wholesale price should be legislated as a minimum. Considering all the benefits the solar feed tariffs have on reducing the demand from the generators, a fixed realistic FIT for the people who go to their own expense to install their solar systems is definitely required to not only encourage more solar installations but also help those who have already installed such systems. The current 5 cents is a very bad and insulting JOKE.
