Submission: "1. I support a fair price for solar;

2. It's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users;

3. Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum;

4. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

While accepting the need for peak time supply, it is necessary for the country to adopt a more reasonable response to the power crisis , which is more of the power companies making than of the solar installed households."
