

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

11:26:53 PM

I support a fair price for solar , one which reflects the movement in wholesale electricity and gas prices. The feed in tariff should be a baseline price which cannot be fudged by suppliers and truly represent the environmental and health factors embraced by renewables versus fossil fuel generation. I have been making most of my homes electricity for some time and some of the silly variations in feed in tariff offered are an insult to ones intelligence.
