SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

6:25:23 PM

We have solar panels on our roof, but get very little (about 5c per kWh) for the electricity we put back into the grid, so I support a fair price for solar;
The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
Thank you for considering my submission.
