**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
4:42:59 PM

We (my family & I) support a fair price for solar electricity generated by home owners. We have invested in a 5kW solar array and currently pay between 9c/kWh (off peak) and 44c/kWh (peak) for electricity we buy, but are only paid a flat rate of 5c/kWh for solar generated electricity we sell back to the grid at the end of the day. This disparity is grossly unfair, and having made the investment in solar energy (and contribution to lower carbon emissions) I would like to see a higher solar feed-in tariff in line with the increased wholesale price of electricity.
