**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

I support a realistic feed-in tariff for roof top solar power generating. I have been a solar energy supporter for 7 years with installations at home and on family owned workshop.

This is making a vital contribution to reducing greenhouse gas emissions and needs recognition thru' the encouraging effect of realistic tariffs-which will surely encourage more investment.
