**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**

5:35:16 PM

I support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; and

my personal experience with my solar system with the feed-in tariff have been : prior to 1 Jan2017 my quarterly electricity bill had always been > \$40 in credit but since then it has been >\$250 per quarter, I feel I have been robbed >\$200 per quarter. For a pensioner it is most unfair !
