Date of submission: Monday, 7 May 2018

Submission: "I view and price paid to me for my solar feed in power, that is less than the amount I'm charged for power at that time of day, as theft, and I will make my vote count accordingly at the next election.

We have to start taking climate change seriously, and roof-top solar with battery storage is a big part of the solution and has to be encouraged.

Regards

John Edwards"
