

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

10:18:35 PM

We were lucky enough to benefit from the 60 cents feed in tariff. But we also took the risks and cost in installing what was then a new technology. We did it because of the alarming information about climate change. Once again we have investing in more panels which will take many years to pay off. To be paid so little for being innovative and helping reduce the countries reliance on coal seems grossly unfair. In any other business this would result in court cases and appeals to the ombudsman. It is not only unfair but does not reward us for our investment that benefits everyone.
