SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
12:06:42 PM

I support a fair price for solar;the current tariff is much too low.

The feed-in tariff should increase in line with the wholesale price of electricity and be regulated so retailers have to offer it as a minimum.

It should represent the true value of solar, which means recognising the environmental and health benefits. Solar is critical to the network especially in times of heatwaves.

I have lived off-grid for the past 23 years and very happy with my solar system.
