SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

2:58:31 PM

Thank you for the opportunity to have a say in the solar feed-in tariff discussion. Our house hold has had solar panels for some years and we have been pleased to receive a reasonable tariff which helps our pocket, allows us to feel that we are participating in the modern world and contributing to our own energy efficiency and thereby relieving the grid of some load. We believe the feedin tariff should represent the true value of solar . This means recognising the environmental health benefits and the network benefits of roof top solar. We support IPART'S proposal to raise the feed-in tariff.
