SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:35:57 AM

Feed-back solar means power stations wont have to be enlarged as demand increases, especially with increasing needs for air conditioning as the world get hotter.

I have installed a 5.2Kw system with batteries and connection to the grid. it works wonders, but was not a 'sound' financial investment. by doubling the tariff others will see its value and invest more in feed-back solar.
