

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
5:38:05 PM

I strongly support an increase in the feed-in tariff for solar electricity in order to truly represent the benefits of this form of electricity generation, such as its environmental and health benefits, its simpler and more efficient network distribution benefits and its avoidance of the climate change damage associated with ALL forms of fossil fuel energy generation. The feed-in-tariff should at least reflect the recent increases in the wholesale price of electricity.

John Kelly.
