SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
11:04:35 PM

Hi IPART.

I'd like to let you know that I strongly support your proposal to increase the NSW solar feed-in tariff benchmark and give NSW residents a fair price for the surplus solar energy they generate. This feed-in tariff should always increase in line with the wholesale price of electricity, and it should not just be a benchmark price range - it must be regulated so that retailers have to offer it as a minimum. I firmly believe that the feed-in tariff should represent the true value of solar, which means that the environmental, health and network benefits of rooftop solar should be properly recognised.
