SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
11:52:22 AM

To Whom it may concern.

I am writing to express my support for a fair feed-in tariff, that should increase in line with the wholesale price on electricity. This should be regulated so that retailers pay a fair price for the service that is provided to them by owners of solar systems.

The price should also recognise that solar power provides a much cleaner form of energy in relation to its effects on the environment and health.

While I am with a company that offers a higher feed-in tariff than most, it is still an insufficient level of payment for providing energy at peak times to the energy companies, for which they themselves charge a handsome sum.

Thanks for your time,

Jo Lancaster
