Submission: The local newspaper advised that we could make a submission on how I find the scheme. I have attended to return cans etc. and on the first occasion, after a considerable wait found that the machine was slow and rejected every 4th or 5th can, eventually all went in. On the second attempt I had to return 3 times because of faults with units. A return trip of 7 k. The same problem of rejecting every 3rd or 4th can, up to 5 times, before all were taken. The machines appear to be of poor quality and for an area a large a Dubbo, insufficient units. Perhaps in time when town to the west and north of Dubbo have their own units thing may improve. I know from reports that the machines have been vandalised a number of time and this does not help.
