Submission: "Dear Sir/Madam Members of the Independent Pricing and Regulatory Tribunal that is looking to cut the NSW solar feed-in tariff benchmark to 8-9c per kWh.

I am making this humble submission to plead to you that as a Pensioner I support a fair price for solar; I feel that I am being punish for helping bring down the price of electricity for all NSW energy users.

The current feed-in-tariff I am currently receiving represents the true value of my contribution of solar after pushing my current retailer for this FiT since by my comparison I saw many not offering a reasonable FiT.

My wife and I watch our monthly expenses to ensure we remain in our comfortable budget and solar has enable us to use our cooling and heating equipment in those few extreme days we experience in NSW each year.

I implore you that my small contribution to maintain our planet 'green is worth a benchmark FiT for all Australians living in NSW.

Thanking you for your consideration in this matter."
