SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

7:14:32 PM

The current situation where we have to pay over three times as much for electricity that we buy from our mains supplier as we get paid for the electricity that we sell to them is insulting. After all the product is identical.

Furthermore there is no financial inducement to customers to help ameliorate environmental conditions by installing new solar power systems.

In my opinion the feed in tariff should be equivalent to the price charged for mains power
