SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:25:43 AM

With no wage rise for several years and electricity prices going up we decided to install solar. We thought we would save quite a bit of money for the cost of the initial outlay. That hasn't occurred at 6c rebate and yet the cost of electricity continues to rise. I support the increase to the tariff to help ordinary Australians with their every day household expenses. The tariff should reflect the true cost of electricity helping our finances as well as the environment.
