Submission: Well this is what I think. Ah yes, once again the "BEACHES", development that has happened to Catherine Hill Bay/Mooney area on the Central Coast, has managed to create another issue for the environment, due to their own selfishness. So first of all they cut down a million friggen trees or whatever, to put all there houses in yada yada yada. And NOW.. the sewerage company who works for the "BEACHES" development, want to dump up to 162,000 litres of treated effluent PER DAY.. into the WATER! That means beautiful Catherine Hill Bay, the creek, and Mooney are going to have treated effluent all through it. Not only is that damaging our seas and animals for obvious reasons, but us too when ever we want to swim or surf! ALSO! The creek that they are planning to dump this crap into, hardly ever breaks into the ocean and flows, so all of this stuff will be running straight into the wetlands that also run along the back of people's properties. And apparently their reasoning behind this is because it's CHEAP.. and EASY.. for them. HA! Piss right off. I'm over dumb ass humans, who are driven by money, and have no respect for our species and our home. Youse have lost the plot. Shame! Let's stand up and not allow this dumping to happen to our beautiful environment!
