

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:19:23 PM

It is self evident that electricity from home solar systems should be bought for a fair price. In NSW a fairer price now would take into account the wholesale price of electricity. If the buyers, the large electricity providers fail to offer a fair price, regulation should require them to behave more reasonably. This applies to the current situation in NSW now. IPART should more than double the present solar feed-in tariff immediately.
