**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
10:37:13 AM

I am currently looking into solar power with battery storage. The prices are high and the feed-in tariffs are low. These prices should be brought in line with the wholesale price of electricity to make the large purchase price more appealing to the general public. How on earth do you expect the dependancy on coal etc will drop if the general public is not encouraged (and I mean financially) to invest in solar power.
