

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:53:20 AM

I write to support the proposed increase in the feed-in-tariff, although I think the proposed price is not high enough and doesn't recognise the importance of the transition away from fossil fuels. The FIT should be mandatory.
I have a 3kw system on my roof and I use less than 2kw a day but am still paying for power in the current system. This needs to change.
