

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Sunday, 21 May 2017**

1:34:03 PM

Dear Sir/Madam

It makes good sense for electricity suppliers to pay a fair price for electricity downloaded from domestic solar systems. It encourages others to install solar systems and thus reduces capital outlays and maintenance for the suppliers. It is also an incentive for consumers to increase the capacity of their solar systems. It is a win win situation.
