Submission: "The NSW Independent Pricing and Regulatory Tribunal (IPART) is considering cutting the benchmark solar feed-in tariff from 11c/kWh to 8-9c/kWh from 1 July.  
What a rip-off. So, we sell at 8-9c/kWh and then buy it back at 32c/kWh. Where is the justice in that. Maybe if the NSW Government should stop selling off all the assets and provide utilities like electricity and water instead of flogging everything to overseas private companies, the state would be a better place to live in."
