SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:31:31 PM

Having invested so much money into purchasing solar panels so as to harvest free solar energy from the sun it is simply scandalous that the energy individuals harvest is given back to the grid for such a paltry return. It is OUR energy that has been generated from OUR investment - the energy companies need to pay a FAIR price for this instead of virtually taking it all for cents. We are trying to do our part for the environment but it isn't helping to punish us with such terrible returns.
