SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
7:23:05 PM

I support a fairly priced feed in tariff for solar power. At present it's less than half what would be a fair minimum price and all of us are getting ripped off. The minimum fair price should increase along with electricity price rises. Solar owners are doing the right thing by the environment and should be rewarded for their contributions to their communities. Please support us in this quest for a fair go. Thankyou. Kathryn Banicek
