

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Monday, 15 May 2017

10:45:28 AM

I totally agree with the submission to make a fair price for solar. As a resident with solar on the roof we have been conned and ripped off, paying over \$10 grand for the utilities on the roof and then constant high ongoing light bills, where we get a buy back rate of 7cents and pay 24cents to use electricity. We were told any usage during the day would cost minimal when we signed up but the power companies don't honour this and charge their rates for your usage.

Please help us make a difference

Regards

K Dean
