SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:46:42 AM

NSW residents should have a fair price for solar. It is unfair that companies make incredible profits from home owners. Our home gets a 6c feed in tariff and we pay 31c when the sun goes down. How unfair is that. In our household we look after a sick relative with a neurological disorder we have to control environmental temperatures. To lessen the impact on the environment and costs we decided to purchase solar. Cannot believe how companies have cashed in and are ripping consumers off especially the elderly that are too scared to turn on a heater!
