

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

11:35:37 AM

I support a fair price for solar. It should at least equal what we are paying for electricity. The feed in tariff should represent the true value of solar and its benefits to the environment. The way things stand solar systems are providing electricity to power companies who are selling it on for a massive profit. I oppose my solar being used this way. Encourage solar use and pay us at least what we are paying power companies for our power.
