

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:39:17 AM

At a time when signs of global warming and pollution is obvious, we should be encouraging more of Australia's population to take up solar power. An increase in the FIT, in order to counter the extraordinary rise in electricity and gas, is what is needed for the good of the Australia and its people
