Submission: "I support a fair price for solar as those who have made the effort and investment to put solarvoltaic panels on their rooftops are helping to Kee the price down at the same time as reducing carbon emissions. The FiT needs to be mandated so all retailers offer a benchmark amount which represents the TRUE VALUE of solar to health and environment.

As a solar owner I've become even more responsible in my demand on energy. I have children and grandchildren for whom I feel responsible for the planet I have borrowed from them."
