Submission: "I support a fair price for solar;

It's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users;

Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

Also not only do providers not pay a reasonable tariff for our solar but they also charge us \$104 to then provide us back with power that we gave them in the first place. That is a total rip off. Under these circumstances we should charge the retailers for providing them with our solar power. How ridiculous, something must be done. If not a higher feed in tariff then eliminate their charge of \$104."
