SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
2:21:14 PM

I support a fair price for Solar the feed in tariff should increase in line with the wholesale price. Residents in NSW should be encouraged to install environmentally friendly Solar systems. More Solar will help avoid the cost of building new power stations. The increase in Feed In Tariff must be mandatory. Energy retailers are making huge profits by paying low Tariffs. I have 24 solar panels and have been waiting since December 2016 for AGL to install a NET meter. Without a NET meter I cannot effectively manage my own electricity usage and generation.

The feed in Tariff should be the equivalent of 70% of the wholesale price, Everyone one wins, the Retailer, the Residential PV owner, the environment and the Solar industry will continue to grow creating jobs, research and development.

Thank you looking forward to a fair price for my investment.
