Submission: why does the normal person get charged for Hunter Waters incompetence we get charged an availability charge on our bill we get charged a lake beautification charge as well they are talking about putting our bills up above inflation. I have got nearly nothing in pay risers in the last 4 years we are a one income family and we have to budget so shouldn't they. If I don't pay my water bill by the due by date I get a final demand and they threaten us with a collection notice why don't they just stop driving around in company cars doing [REDACTED] and reign in there spending like the rest of us have to it might not sound like much but money is tight and getting harder to come by I can't go asking my employer for a pay rise above CPI it just doesn't work. They should just learn to handle the money better.

I have had my whinge I just don't think its fare that they can't handle there money and they just keep wanting more
