

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
5:00:52 PM

Having installed solar energy two years ago I was too late for anything but the 0.06cent feed in tariff. Currently considering installing batteries due to this fact as I do not feel that I should be subsidising the electrical companies with my power. An increased feed in tariff would definitely make me reconsider my decision however I believe that any increase should be a benchmark.
