

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

5:03:33 PM

Please make solar more affordable. It is the best way to create a sustainable Australia.

Encouraging people to adopt Solar by paying a feed in tariff that is attractive is the only sensible action. If Australia wants to embrace renewable energy then the government needs this to be reflected in its policies so that it is financially logical to choose clean energy.

i have solar energy on my roof an I believe if we are not paid correctly for what we generate then it is a farce.
