SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:12:52 PM

The current feed in tariff makes it hardly worth the effort to have excess solar go back into the grid. Luckily I have 2 systems so I turn one off when I can't use the power generated myself. It would be good to have a decent feed in tariff so I could leave it turned on and actually get a decent return from my excess feed it.
