Submission: "We have 14 solar panels on our roof, thereby contributing to the easing of the energy crisis in Australia caused by ultra conservative attitudes in the federal Coalition Government.

I support a fair price for solar; It's ridiculous to punish solar owners who are helping bring down the price of electricity for all NSW energy users;

Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum; The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar."
