

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

9:41:45 AM

The initial offer of 60 cents by the government was too generous for the installation however it did its job in attracting investors.

The result of the initial offer has saved the government millions of dollars ;

(1) in not having to update old generating plant.

(2) Solar Panel owners has helped the Government fight against Climate change by reducing carbon emission.

(3) unfortunately Solar Panel owners have also helped the Government sell off the electricity plant by helping to NOT show up the inefficiencies of the current POWER GENERATING SYSTEM.

WHAT A GREAT CON.

I don't believe the government should lose money on the the rebate system but by the same the government should BE FAIR AND NOT LOOK AFTER THE BIG BOYS

Look after the voters .

Thank you

Leon Babinski
