SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:47:57 PM

I would like to request that the feed-in tariff should be increased in line with the wholesale price of electricity.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum. I believe the feed-in tariff should represent the true value of solar. Households with solar have recognised the benefits to the environmental, health and the distribution network benefits of rooftop solar. We are real people who have used our own money to install our systems which benefit all power users, we should be paid a reasonable price for our excess being fed into the grid. Regards, Lorraine & Tony
