SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
9:02:05 PM

I believe that solar should be more valued especially when it is supporting the infrastructure and easing the need for additional coal burning power production. It's cleaner and should be as valuable as the electricity we pay for as it is all profit to the electricity provider otherwise. Why should I spend \$10,000 to save my electricity costs but pay exorbitant rates for night time electricity
